AeroPod 01

Patient Transfer Protection Pod

The AeroPod 01 is a quick, simple, and effective solution designed to provide an extra layer of protection during patient transfer within healthcare settings. Compatible with standard hospital beds and stretcher equipment, it helps reduce the spread of contagion via aerosol dispersion—safeguarding both attending staff and the surrounding environment.

KEY FEATURES & BENEFITS

Infection Control
Enhanced protection for both patient and medical staff during patient movement.

Protects Environment
Prevents aerosol spread when transferring patients between wards or departments.

Reusable Structure
Main frame is reusable with a disposable outer sheet for improved infection control.

Quick Patient Access
Designed for rapid and simple access to the patient in case of emergency.

Lightweight & Portable
Compact and lightweight for easy deployment and transport.

Cost-Efficient
Ideal for short and low-risk transfers as an improved control measure.
