Infection control across the patient pathway

Three solutions, each supporting a different stage of care.

CLS SURGICAL

AMDEL MEDICAL

1 → 2 → 3

AEROPOD

Patient transport

Helps contain airborne particles while patients are moved by road or air.

ShareGuard 99®

Bedside isolation

Creates an isolated space at the bed, helping reduce the spread of aerosols and droplets.

Freedom60® INFUSION SYSTEM

Subcutaneous medication delivery

A portable infusion pump that lets patients continue subcutaneous treatment at home.

Products are supplied separately for use at different stages of care. Always refer to each product's instructions for use.
